Mr. James W. Smith, Jr.
Coordinator, Mined Land Development
Division of Oil, Gas, and Mining
State of Utah
4241 State Office Building
Salt Lake City, Utah 84114

Dear Mr. Smith:

Recently the Anaconda Minerals Company has undergone a complete reorganization at its Denver headquarters, with the loss of approximately 300 persons. My position, as Project Coordinator - Exploration, in the Health, Safety and Environment group, has been eliminated.

Consequently, responsibility for the continued development of our Reclamation Plan for Carr Fork Operations will rest with Larry D. Tinker, Manager, Health, Safety and Environment at Carr Fork. You may write or call Larry at the following address:

Anaconda Minerals Company
Carr Fork Operations
R.F.D. #1 - Box 79
Tooele, Utah 84074
801-882-5539

We have asked the Grantsville Soil Conservation District for technical assistance to help establish our Reclamation Plan. The Soil Conservation Service has responded with a proposed "Scope of Work" which includes a range inventory and evaluation to be completed this fall and a vegetation inventory to be completed next spring.

I sincerely regret not being able to continue with the project. However, I will be in-and-out of my Denver office from now until November 15. If you have any questions please call (303-575-4179).

Sincerely,

A. Robert Easter

A. Robert Easter
Project Coordinator
